No. 3324

Dear Mr. & Ms. Smith: April 9/07

I don't know what to say except the environmental assessment should be a critical part of the placement of wind turbines. We've learned that windmills can kill birds & bats, so their positioning is critical.

Wind is a critical part of our energy future but we've got to do it right. Raise hell with your local politicians & don't let a turbine get installed without the EA. Good luck.

David Suzuki
